

IPSS **Hot Rolling** **Consulting** **Services**

IPSS process consultants have years of mill experience and they can assist you. These are the primary areas we find our customers requiring our assistance:

- Roughing Mill computer setups - troubleshooting & tuning
- Finishing Mill computer setups - troubleshooting & tuning
- Strip cooling control (inter-stand and runout table)
- Strip profile and flatness setup and control improvements
- Looper performance analysis and control improvements
- Automatic gauge control analysis
- Strip tracking
- Width control and yield optimization
- Roll crown practice reviews

Please Note: IPSS has a full line of process models for hot rolling applications that have been installed in the US and internationally – please contact us for further information Doug Jones at (630) 850-7864 or dougjones@ipssinc.com
